

# Food Service Grade Electric Pressure Washer for Incoming Water Temperatures of up to 180°F

## Portable Electric Pressure Washer Designed for the Food Service Industry; Accepts Incoming Water of up to 180°F

You've heard the saying, "If you can't stand the heat, stay out of the kitchen." Kärcher's HD 2.3/14 C Ed Food can take the heat. It withstands incoming water of up

to 180°F making it ideal for kitchen and food service applications. Its compact design and portability make it convenient for fast cleanups while its commercial-duty components make it tough enough for all cleaning jobs. Non-marking hose and wheels leave no traces behind; rugged 3-piston commercial axial pump ensures long service life; total trigger shutoff saves energy; and protective cover shields components from overspray. This unit is ETL safety certified to rugged CSA and UL standards.

- **Components rated for 180°F**
- **Patented Commercial Axial Pump**
- **Complete Trigger Shutoff**
- **Non-marking accessories**

**Dimensions:**  
15"L x 14"W x 37"H

### TYPICAL APPLICATIONS

- Restaurants
- Bakeries
- Kitchens
- Food Markets
- Food Processing
- Fast Food

### ACCESSORIES

Accessories enhance the cleaning impact of a pressure washer. For instance, the FR 30 ME surface cleaner easily attaches to Kärcher's food service pressure washer and, using a rotating power nozzle,

cleans flat surfaces faster and deeper than with the pressure washer alone. It saves you time and eliminates the streaking associated with pressure washing by hand.

- Heat-resistant components allow machine to withstand incoming water with temperatures of up to 180°F
- Adjustable downstream **chemical injection** system for precise detergent application
- Compact and robust 3-piston **axial pump** features brass cylinder head and hardened steel pistons and valves
- Pump is protected by a **pressure switch** and overflow valve
- Built-in **motor protection** against voltage fluctuations and excessive temperatures
- **Non-marking hose**, with integrated connection, swivels inside the gun under full pressure to avoid tangles
- Infinitely variable adjustment of **pressure and water flow** allows optimum flexibility for different cleaning tasks
- Patented **motor/pump** unit is integrated in a single housing, ensuring extra-efficient energy transfer
- Pressure-controlled **automatic shutdown** system stops the motor and pump completely when the trigger gun is released, extending the life of key components
- Light-weight **upright** construction features **pull-out handle** and **non-marking wheels** for easy portability
- Rear **cable/hose rack** provides added convenience
- **Protective cover**, made of corrosion-proof, high-impact materials, shields key components from overspray
- Comfortable non-fatiguing **trigger gun** features "one-finger" operation
- Stainless steel **spray lance** rotates 360° under pressure
- **Triple nozzle** can be adjusted for 0° pencil jet, 25° fan spray, or 40° low-pressure chemical application
- **ETL certified** to established UL and CSA safety standards
- **Ground-fault circuit interrupter (GFCI)** provides additional safety for operator
